

**STUBBE'S**  
PRECAST

## WHISPERCRETE™

Whispercrete™ by Stubbe's Precast is a versatile sound wall system designed to meet the noise mitigation needs of various sites, from residential developments to large-scale rail corridors.

Available in reflective or absorptive finishes, the Whispercrete™ modular system can be customized to suit specific acoustic, structural and aesthetic requirements. The primary goal is to effectively reduce unwanted noise to acceptable levels.

# FEATURES

- Modular, post and panel system
- Standard panel heights of 0.5 m (1.64') and 1.0 m (3.28')
- Optimum post spacing of 4.88 m (16')
- STC rating up to 49
- Double-sided or single sided absorptive or full reflective panel finish
- Minimum NRC of 0.70 for absorptive panel faces
- Hot dipped galvanized steel posts
- Panels manufactured in a CPCI certified Ontario Plant
- Endless selection of form liner patterns and colours to choose from
- Turnkey packages available from initial design through to full installation
- Whispercrete™ noise barriers can be integrated with retaining wall panels as a cost-effective option for sites with grade differential challenges

# APPLICATIONS

- High traffic roads and highways
- Municipal road widenings
- New or existing rail corridors including new stations and maintenance facilities
- Generator or transformer enclosures
- New residential developments
- New industrial and commercial developments including trucking yards
- Hydro stations
